

JOURNEY PLAN READY REFERENCE

This is a free website that helps you plan the most efficient way of making a journey without the use of a car. It can help you find suitable bus routes, map out the quickest or most scenic route and provide information about all public transport running to and from where you want to go. To begin planning your route:

1. Log on to the free website www.transportdirect.info.
2. The home page will allow you to select a door to door planner so that you can choose the walking route, bus route, cycle route, train or coach etc to your destination. The journey will cover all of the different modes of transport needed to reach your destination.
3. You will need to firstly enter the relevant addresses:

i.e. From: 1 Birkenshaw Road To: Highcross, Leicester

*It is important to write the city after the address and not to forget the comma. You can select specific times to make your journey. Then select the **Next** button.*
4. The screen will then show a route map. The map will highlight both the bus and walking options. For any other options you will need to specify before you enter the journey details i.e. cycle route etc. You can select all or parts of the journey to print out.
5. The journey breakdown can be emailed to others and added as a favorite on the website. A list of web-site features can be found on the left hand side of the page.

The images on the following page will walk you through the process described above. (*Images taken from www.transportdirect.info*).
